### Profile

I am practical knowledge seeker. To work in an environment where my skills and knowledge reflects the growth of the company and enhance my knowledge and experience. I had a knowledge of my engineering subjects although I am learning web development through which we can change the world with new possibilities. To make it possible some skills I am learning like NodeJS, MongoDB, HTML, JavaScript and Python.

### Education

- **Bachelor in Computer Science and Engineering**  
*DIT University Dehradun* 2020 - 2024  
Done graduation from Doon Institute of Technology in 2024 and currently focusing on full stack development
- **Courses**  
*Certification (DITU)* 2020 - 2024  
java, Linux, RDBMS, Cyber Security, Network communication, Entrepreneurship

### Projects

- **Finvi (Prediction website)** 2020 - 2024  
We start learning form Youtube and also that how we can integrate prediction in the website , We use linear regression technique for the prediction.  
We start learning about the technology that are required to build an website including both the front-end and the back-end.
- **Snake Game** 2020 - 2024  
I had made the snake game with the help of YouTube. The code is written in python programming
- **Music Player** 2020- 2024  
I had made the music player with the help of java programming. The project was done under the period of Technical Training 2 in college. The trainer help us to guide about the project.
